

## Stallion Service Contract

This stallion breeding contract for frozen/chilled semen for the 2011 breeding season is made and entered into on the \_\_\_/\_\_\_/2011 and is between Gene & Tracey Redwood (stallion owner) hereinafter designated the breeder and \_\_\_\_\_

\_\_\_\_\_ (mare owner or lessee), hereinafter designated the mare owner.

Mare owner agrees to breed the mare \_\_\_\_\_

Registration number \_\_\_\_\_ Breed \_\_\_\_\_

to the quarter horse stallion Hez da One, registration number Q57796 , for the fee of \$1430.00 (including GST) for a live foal, subject to the following conditions:

1. The mare owner agrees to pay:
  - a. The full service fee of \$1430.00
  - b. The deductible, non-refundable booking deposit of \$550.00  
This entitles the mare to be bred with frozen semen up to a maximum of three cycles only. (One cycle = one dose, one dose = eight 0.5ml straws as per protocol of Goulburn Valley Equine Hospital) or chilled semen, which will be available for a limited period whilst stallion is at stud at ALAB (Modella, Victoria). Should the mare fail to achieve a positive pregnancy using chilled semen, after the stallion has departed ALAB, frozen semen will be made available at the above conditions. On receipt of the booking deposit GVEH (for frozen semen) or ALAB (for chilled semen) will be notified in writing by the breeder to release either two doses of frozen semen to the mare owner's nominated veterinarian or to arrange for the collection of chilled semen. The first collection of chilled semen will be paid by the stallion owner, subsequent collections are at the mare owners expense and are to be paid directly to ALAB. If the nominated mare fails to achieve a positive pregnancy after two cycles with frozen semen a third dose will be sent at no additional charge.
  - c. If a positive pregnancy is not obtained after three cycles using frozen semen and the mare owner wishes to continue breeding the above-nominated mare, the mare owner agrees to 1) having their veterinarian contact the breeders nominated veterinarian and 2) paying an additional (non-deductible, non-refundable) booking deposit of \$330.00 which entitles the mare to be bred with frozen semen for two additional cycles, provided the semen is available.
  - d. The deductible breeding deposit upon application. The balance of the service fee is payable on a 45 day positive pregnancy test. Invoices are payable on receipt. All fees are GST inclusive. The breeder reserves the right to charge interest on any overdue accounts.
  - e. The mare owner agrees to pay all transport and handling charges from GVEH, located in Congupna (near Shepparton), for frozen semen and from ALAB at Modella for chilled semen (order form and prices available from stallion owner on request)
2. The mare owner warrants that the details on the above named broodmare contained in the service application form (see attached) are true and correct and that the broodmare shall be healthy and in sound breeding condition, this fact to be certified by a qualified veterinarian before the mare is bred if necessary.
3. Should the stallion be unavailable for any reason whatsoever before breeding the said mare, then this contract shall be rendered null and void and the booking deposit will be returned to the mare owner.  
If the said mare named in this contract dies or becomes unfit to be served after the deposit has been paid, then this contract shall be rendered null and void. The breeder has the option to either a) accept another mare as replacement during the current breeding season or b) breed a replacement mare in the following breeding season. If frozen semen has already been shipped to the mare owner's veterinarian, then storage charges are the mare owner's responsibility.
4. The mare owner agrees to pay all charges applicable to the broodmare and/or progeny.

Please initial \_\_\_\_\_

5. A breeding certificate will be issued for the foal conceived by this mating, when all stallion fees and any other expenses incurred by the stallion owner on behalf of the mare owner, have been paid in full. Should more than one embryo result from the breeding, the mare owner agrees to pay an additional stallion service fee, less \$110, within ninety days of breeding in order to receive a breeding certificate for the second foal. The only exception will be if the mare delivers twins as certified by a veterinarian. In the case of twins, upon receipt of the additional stallion service fee, less \$110, mare owner may request an additional breeding certificate after both foals stand and nurse.

6. This contract contains a "Live Foal Guarantee" (LFG). A live foal is described as a foal which stands and nurses. If a foal is born dead, there are return privileges for the following season, only if the breeder is notified in writing within seven days and receives a veterinarian's certificate confirming death. If after being pronounced "safe in foal" the mare should miscarry, abort or prove barren, the mare owner has the privilege to rebreed the above nominated mare during the current breeding season, defined as 1/9/11 through 31/1/12 or the following breeding season 2012. The mare owner may rebreed the mare using any semen remaining from their initial shipment if using frozen semen. If the mare owner has used their three doses of frozen semen they may pay an additional (non-deductible, non-refundable) booking deposit of \$330.00 which entitles the mare to be bred with frozen semen for two additional cycles, provided the semen is available. Chilled semen maybe used at no additional charge provided the stallion is at stud, the mare owner is responsible for collection costs.

7. The mare owner agrees to inform the breeder of the number of frozen semen straws remaining once a positive pregnancy is achieved. All remaining semen remains the property of the breeder. The mare owner may not transfer the remaining semen without the written permission of the breeder and payment of any relevant fees. The mare owner is responsible for any costs incurred in storing the remaining semen unless the semen is returned to a location as advised by the breeder. The breeder reserves the right to collect and transport any remaining semen at the breeder's expense after the mare has produced a live foal and if the mare owner does not wish to rebreed to the stallion in 2012. Rebreding is subject to the terms and conditions of the 2012 stallion service contract. The semen may not be destroyed without the written approval of the breeder or charges may apply.

8. This contract shall not be assigned or transferred by the mare owner and in the event that the said mare is sold the service fee shall immediately become payable by the mare owner.

9. The breeder aggress that the stallion will be registered with the Australian Quarter Horse Association and all relevant fees paid.

10. This contract represents the entire agreement between the parties. No other promises, agreements, verbal or implied, are included unless specifically stated in this written contract. The original contract will be kept on file by the stallion owner and a duplicate provided for the mare owner.

11. All payments of deposits and service fees are to be made directly to Gene Redwood Quarter Horses. Payment methods are cash, cheque, money order or direct transfer into nominated account.

When mare owner and breeder have signed this contract, it will then be binding on both parties, subject to the above terms and conditions.
